PROJECTS

- PROJECT 1: Cambridge Job Portal** | *Laravel Framework* | [GitHub](#)
Responsive Laravel web applications with Tailwind CSS, improving experience, performance and development efficiency.
- PROJECT 2: Personal Trainer using Human Pose** | *Maching Learning* | [GitHub](#)
AI-powered pose estimation system using Python with framework and libraries like OpenCV, Mediapipe, and NumPy with real-time exercise tracking and automated feedback.
- PROJECT 3: E-Commerce Website** | *PERN Full-Stack* | [GitHub](#)
Built secure full-stack applications with user authentication, admin, cart, orders, Stripe payments, backend APIs, Zod validation, and React Hooks.
- PROJECT 4: Blog Website** | *MERN Full-Stack* | [GitHub](#)
Developed a full-stack Blog Application where users and admins can create and manage blogs with images, titles, descriptions, and categories. Implemented admin management, user authentication, CRUD operations, and secure backend APIs.
